

Vedant Shamling Limbhare

Data Analyst

Vedantlimbhare22@gmail.com | (571) 564-8786 | USA | [LinkedIn](#) | [GitHub](#)

Summary

Data Analyst with 3+ years of experience in healthcare and finance, skilled in SQL, Python, data visualization, and statistical modeling. Delivered data-driven insights that improved clinical outcomes and reduced operational costs by 20%, while guiding strategic decisions that led to \$500K+ in annual savings. Experienced in working with large datasets, developing ETL pipelines, and building interactive dashboards for operational and investment reporting.

Technical Skills

- Programming & Scripting:** Python (Pandas, NumPy, SciPy, Matplotlib, Seaborn), VBA, R, Shell Scripting
- Data Analysis & Statistical Modeling:** Logistic Regression, Clustering, Statistical Testing, Forecasting, Hypothesis Validation, EDA
- Database & Querying:** SQL (CTE, Window Functions, JOIN, GROUP BY), PostgreSQL, Azure Data Explorer, Google BigQuery
- Data Warehousing & ETL Tools:** Snowflake, AWS Athena, AWS Glue, dbt, Apache Airflow, Azure SQL, Databricks
- Business Intelligence & Reporting:** Power BI (DAX, Drill-through, KPI, Dynamic Filters), SSRS, Excel, Tableau, Looker
- Automation & Workflow Optimization:** Excel Automation, VBA Macros, ETL Pipelines
- Collaboration & Agile Tools:** Scrum, Daily Stand-ups, Sprint Planning, Retrospectives, Jira, YouTrack, Confluence, Git

Professional Experience

Data Analyst, AQR Capital Management

03/2024 – Present | Remote, USA

- Queried and segmented 2M+ investor transaction records using SQL and AWS Athena, enabling performance benchmarking and cash flow modeling across client portfolios.
- Applied Python libraries Pandas, NumPy, and SciPy for robust data preprocessing, regression analysis, and statistical validation to support hypothesis-driven portfolio attribution.
- Built and optimized Power BI dashboards and reports using advanced DAX functions to monitor investor trends and allocation shifts in real time, improving internal reporting efficiency by 35%.
- Conducted monthly and quarterly forecasting of asset allocation shifts and fund flows, increasing forecasting accuracy by 20% using Excel-based financial models and scenario tools (data tables, goal seek, scenario manager).
- Engineered robust ETL pipelines using AWS Glue, integrating investor transaction data from disparate sources with automated data validation, reducing data integrity issues by 30%.

Data Analyst, Capgemini (GE Healthcare)

02/2020 – 05/2022 | India

- Engineered automated reporting workflows by integrating Excel, VBA, and SSRS to streamline healthcare analytics reports, reducing manual data processing efforts by 65% and saving approximately 25 hours/week.
- Optimized SQL queries in ETL pipelines by restructuring Snowflake schemas and tuning partitioning strategies, cutting query times by 40% and enhancing dashboard responsiveness.
- Applied statistical models (logistic regression, clustering) to analyze provider engagement and patient outreach in Salesforce CRM, boosting churn prediction accuracy by 15% and enabling more precise customer targeting strategies.
- Performed exploratory data analysis using Power BI visualizations and PostgreSQL to identify patterns in procedure volumes, regional sales activity, and client retention, directly influencing strategic business decisions.
- Used Databricks and PySpark for collaborative data analysis with data scientists and business leads, improving response time for on-demand analytical requests by 30%.
- Led Scrum (JIRA) processes like daily stand-ups, planning, and retrospectives, resulting in quicker stakeholder insights.

Data Analyst Intern, Romas Electric Pvt. Ltd.

06/2019 – 12/2019 | India

- Analyzed operational data from solar power plants, processing 1M+ data points using Python and Excel to identify energy generation and distribution inefficiencies.
- Created dashboard utilizing SCADA to visualize and monitor the real-time performance of solar energy generation, improving efficiency by 25%, and achieving quarterly cost savings of approximately \$80,000.

Education

George Mason University

Master of Science in Data Analytics Engineering – GPA (4.0/4.0)

Fairfax, VA, USA

01/2023 – 12/2024

Smt. Kashibai Navale College of Engineering

Bachelor of Engineering in Electronics and Telecommunication

Pune, India

8/2015 – 05/2019

Certification

Finance & Quantitative Modeling for Analysts

Google Certified Data Analysis with R

06/2025

07/2023
